

The Center for School Law & Policy

2008-09 Education Law Classes & Trainings

At the Center for School Law & Policy, we are dedicated to providing educators with the knowledge and understanding necessary to pursue their most important function with confidence and efficiency, as free as possible from expensive, time-consuming legal challenges. For this reason, we have developed a series of education law classes specifically for today's school administrator. Taught by practicing education law attorneys, and grounded in thorough research into the most recent judicial and legislative developments, these classes offer what we believe to be a unique blend of academic and professional expertise, along with practical advice and suggestions for addressing the very real problems educators face today. In the past, these classes have largely been available as stand-alone conferences, which often made attendance impractical for the majority of School District supervisors and administrators. In today's economic and financial environment, we certainly appreciate the hard choices school boards, superintendents and school administrators must make in allocating their time and fiscal resources while also providing the continuing education and professional learning necessary to avoid costly mistakes. We are pleased, therefore, to offer a comprehensive list of our seminars on the in-service model—we will gladly bring these programs to your school or school district on a date of your choosing, allowing for the education of as many of your administrators as you desire in the most efficient, convenient and economical manner possible, and targeted to meet your specific needs.

For available dates and program rates, please contact Dan Murphy at (770) 867-7446 or danmurphy_1@msn.com.

For Superintendents, Professional Learning
Coordinators & School Administrators
The Center for School Law & Policy Presents:
“2008-09 Training Classes”

"Today, education is perhaps the most important function of state and local governments...it is required in the performance of our most basic public responsibilities...it is the very foundation of good citizenship...in these days, it is doubtful that any child may reasonably be expected to succeed in life if he is denied the opportunity of an education." Chief Justice Earl Warren, Brown v. Board of Education of Topeka (1954)
